Here is the preliminary design if this something you would like to do:

- We will need 1000 thousand to start
- Spec is 2.25 dia. Brass ring\_for this I recommend a Specification for Brass cz-121 such as: tube stock is very cost effective and reduce machining time.
- The stainless star is or can be or perhaps (303 is an "18-8" chromium-nickel stainless steel) non-corrosive-of course
- Decorative screws or face nut quantity of 5 (Brass)
- Finish: clear coat protective and polish mirror or brush, to finish out.
- We need a way to fasten to a wallet or shirt or vest (pin or stud)
- Please come up a brass decorative screws or fastening nut total five per unit we can look at (no rivets must be removable)
- The cosmetic overall appearance cannot change (voted on by a committee of peers national collective)
- We can change shell valve and volume for weigh to include center of gravity shift.
- We will need to grow a part abs OK... before production. (Required)
- I will send you the model (S-works). Or Pro-engineer.
- Each badge will be sequentially numbers starting with 00001 to 10000
- Payment will come from Colorado marshals and grand jury organizers (wonderful people).

Thanks Dominick 714 747-4477
